

`st.cache` is deprecated and will be removed soon. Please use one of Streamlit's new caching commands, `st.cache_data` or `st.cache_resource`. More information [in our docs](#).

Note: The behavior of `st.cache` was updated in Streamlit 1.36 to the new caching logic used by `st.cache_data` and `st.cache_resource`. This might lead to some problems or unexpected behavior in certain edge cases.

Pclass vs Survived

Feature Engineering: Family size

Key Insights

- Females have a higher survival rate than males.
- Passengers in 1st class had the highest survival rate.
- The majority of passengers are in Pclass 3.
- Younger passengers tended to survive more often.
